QUESTION 15.

This application represents a change in the place of use of a portion of Carson River Claims #249 and #817, more particularly described as being 63 acre-feet of Claim #249, appurtenant to 14 acres within the W $\frac{1}{2}$ Section 30, T.14N., R.20E., M.D.B. & M. and 25 acre-feet of supplemental storage from Ambrosetti Pond under Claim 817.

This water represents the balance of said claims heretofore changed by Permit 51856 and appurtenant to the decreed place of use. Water is diverted from the East Fork of the Carson River (Segment 2) via the Williams Slough. The existing and proposed points of diversion are the Williams Slough, located within the NE $\frac{1}{4}$ SW $\frac{1}{4}$, Section 24, T.13N., R.19E., M.D.B. & M. No change in the point of diversion is contemplated by this application therefore the priority dates shall remain the same. All practices and regulations of water diverted under Segment 2 shall be observed in accordance with the Carson River Decree.

This temporary application is being filed in order to facilitate the use of the water on the proposed place of use in the upcoming irrigation season. A permanent application will be filed in the near future.

For the existing point of diversion and place of use, please utilize the appropriate Carson River Decree map(s) and the map on file under Application 51855.
